# micron 5

## Highlights:

### Rotary switch

The micron 5 comes standard with rotary switch plus 10 two-step HBC push buttons. The transmitter thus offers an enormous range of functions for diverse fields of applications.

### Ex version (optional)

The micron 5 is available in a special version for Ex zones Underground / 1 / 2 / 21 / 22, opening up numerous additional fields of application.

### User identification (optional)

The HBC Smart Card protects the control from unauthorized use. It enables the blocking of safety-relevant functions for non-authorized personnel as well as the storage of useful operational data.

### Vibration alarm

This function is triggered by low battery level. As an option, it can be used for feedback information such as warnings of impending overloads.

### Frequency management (optional)

A fully automated frequency management via DECT or 2.4 GHz technology ensures interruption-free radio operation without frequency conflicts.
